

Online Resources for Paediatric Gastroenterology, Hepatology, and Nutrition Professionals

Dear [Colleague](#),

I hope this email finds you well. In collaboration with the ESPGHAN Education Committee, I am pleased to share some valuable online resources we have recently developed. We would be grateful for your support in promoting them as part of our shared commitment to improving digestive and nutritional health in paediatric populations globally.

1. E-Learning Resources

We develop free online courses (MOOCs) to equip paediatric gastroenterology, hepatology, and nutrition professionals with knowledge and skills to deliver more effective care in their clinical practice.

Our first course, [Enteral Nutrition in Preterm Infants: ESPGHAN Recommendations](#), has already been completed by nearly 2000 people worldwide and we have three more MOOCs in the pipeline:

1. *Paediatric Gastroenterology: Management of Foreign Body Ingestion in Children*, launching by the end of 2024
2. *Viral Hepatitis in Children*
3. *Practical Guidance on Management of Short Bowel Syndrome*

We can notify you when these courses go live, so that your members benefit from these excellent online resources.

2. The ESPGHAN App

We are also delighted to introduce our new mobile app, designed to assist healthcare professionals in their daily care of children with gastroenterological, hepatological, and nutritional disorders. The app features:

- Interactive tools to help diagnosis and treatment decisions.
- Latest episodes of our podcast, with insights from leading healthcare experts.
- Published guidelines and recommendations tailored to specific conditions including inflammatory bowel disease and Wilson's Disease.

These features make the ESPGHAN app a valuable tool to enhance clinical decision-making, stay informed, and provide excellent patient care.

How can you help?

To maximise the reach and impact of these resources, we kindly ask for your assistance in promoting our MOOCs and the ESPGHAN app within your society. We would be grateful if you could share information through your newsletters, social media, and other communication platforms:

- Our live online course - [Enteral Nutrition in Preterm Infants: ESPGHAN Recommendations](#)
- The ESPGHAN app - available on [Google Play](#) and the [App Store](#)

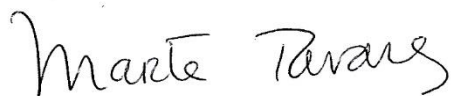

Thank you for your collaboration and support as we continue to work toward our common goal of improving children's health worldwide.

Yours sincerely,

Marta Tavares

International Affairs Representative

ESPGHAN, The European Society for Paediatric Gastroenterology, Hepatology and Nutrition
