

## ESPGHAN Research Network Survey

Dear [colleague](#),

I hope this email finds you well.

I am reaching out to you on behalf of ESPGHAN, as the Society is currently launching a new project to establish a formal research network for paediatric, gastroenterology, hepatology and nutrition.

Any centre/Institution where PGHAN-related basic science and translational research is undertaken, is encouraged to fill a very short survey <https://www.surveymonkey.com/r/GCZYQWR> in order to formally appear on the ESPGHAN research network map. This will contribute towards effective, easy-to-access future research collaborations across all ESPGHAN centres involved.

We would be most grateful if you could share this message and the link to the survey with your national newsletters and PGHAN networks, so that we can reach as many relevant units as possible across the globe.

Your support is truly appreciated and will contribute to strengthen the quality and scale of research in our areas of interest through a large, formal, well organised, active network in the very near future.

Kindest Regards,

The ESPGHAN Scientific Secretary

The ESPGHAN Research Committee

The Special Interest Group for Basic Science and Translational Research

**Marta Tavares**

**International Affairs Representative**
